- ICS 51 – Introductory Machine Organization
- Informatics 43 – Introduction to Software Engineering
- ICS 6 Series – Linear Algebra
- ICS 30 Series – Programming with Python

SKILLS

Design / Web Design

Studies on user-centered design and usability

HTML, CSS, JS,
Jekyll(Blog)

Web Development

Hybrid web development using React or Ionic

CMS and E-Commerce Experience

Programming

Most experience in high-level programming

Python, C++, Java

EXPERIENCE

University of California, Learning and Academic Resource Center (LARC)

Tutorial Leader

September 2017 - Current

- Facilitate active learning environments and discussions for Information and Computer Science course
- Help students develop a greater understanding of the material, as well as increase self-confidence.
- Attend lecture of course being taught and create lesson plans according to the material covered, preparing for future assessments or assignments.

Whale Startups

Lead Developer

September 2016-September 2017

- Lead Developer in student-organized startup based on creating in-house applications for the students at UCI.
- Adhere to given schedule and timetable, tasking a team of developers to follow that schedule.
- Implementing Agile development and appointing tasks and scope of involvement to development team.

DreamZone Designs

Website Design

December 2013-January 2015

- Using Content Management Systems (CMS) such as WordPress to develop and design websites.
- Incorporated PHP, CSS, and HTML to create custom themes and/or modify existing websites.
- Maintained and updated client websites as needed.

RELEVANT PROJECTS

- Redeveloping a commercial website using React platform to improve scalability and efficiency while maintaining the pre-built database and structures.
- Recreated logic for games such a Monopoly, Othello, Battleship, other board games, and basic arcade games using to get accustomed to new environments or introduction to new programming features & techniques.
